GAME DESCRIPTION

Step into the Workshop in **Gearlab Genius!**

Gearlab Genius is a **5x4 ways game** set in a clever mechanical lab where **reels can sync, multiply, and transform**. Before each spin, reels may become synced, showing identical symbols and creating new patterns across the grid.

Reels can also turn into **Super reels** filled entirely with **Wild symbols**, while Reel Multipliers apply to any win passing through them. **Multiple Reel Multipliers** add together when part of the same win.

Trigger bonus game to guarantee synced reels and take your adventure to the new level. With its mechanical theme, feature-rich gameplay, and a max win potential of **10 000 times your bet**, **Gearlab Genius** delivers a smart and engaging reel experience.

The max win can be achieved in all game modes.

FEATURES

REEL MULTIPLIERS

Each reel has a multiplier field on top. During each spin, these fields may draw a random multiplier value or stay without one.

Possible multiplier values: 2x, 3x, 4x, 5x, 10x, 15x, 20x, 25x, 50x, 100x.

If a win passes through a reel with a multiplier, the win is multiplied by that value.

If a win passes through multiple reels with multipliers, the values are added together before applying to the win.

The multiplier resets with each new spin.

SYNCED REELS

Each spin before the reels stop, a draw determines if any reels will be synced.

Synced reels display exactly the same symbols in the same order.
It is possible to sync 2, 3, 4, or all 5 reels.

Synced reels do not need to be adjacent, for example reels 1, 3, and 5 can be synced.

Note: FS Scatter symbols do not appear on synced reels.

SUPER REEL

Any reel, including non-synced reels, can randomly become a Super reel.

A Super reel is a full reel of regular Wild symbols.

If a synced reel is selected to be a Super reel, only that specific reel turns to Wild symbols, not all synced reels.

Up to 5 Super reels can land in a single spin.
